AUTHOR

Krisshav Gujral an Independent Researcher, who has done various studies in Numerology, Vedic Numerology, Astrology and Vastu Shastra. He after doing vast study in Numerology and Astrology has come up with this study of **ASTRONUMEROLOGY** and so is this book. He also provides consultancy in this field to the people in India and abroad.

Krisshav was born and brought up in the middle-class family in India. After completing his schooling and engineering, he worked in the field of technology, sales and operations with various companies. After giving 20 years of life in various organizations, he planned to devote himself completely in the occult sciences. His journey started in Covid-19, when he was down with fever in pandemic and was isolated in his own house where there was no one to talk to and was in fact room prisoned. In the free time whenever he switched on TV there was fatal news on every channel which made him depressed. So, at that time he tried to utilize that isolation period by studying astrology and numerology. Of numerology, he was carrying the basic knowledge of it before also as his mother has bent towards the numerology since past many years. So, then he made an independent study of both Astrology and Numerology and then combined both these sciences to bring a new **ASTRONUMEROLOGY** concept.

VEDIC ASTROLOGY

According to Vedic Astrology everything is predetermined as per the Laws of Karma. What all you have done in your past life you have to face its consequences in this life. If you have done good deeds in you past life then this life will be fruitful but if have done something bad in your past life then you have to face its consequences in this life. Its same as what you sow, so shall you reap. Astrology is not anything that will allow you to escape from your past deeds but it's only a support system that will help you to face the difficult situations and reduce its negative impact to some extent like the resistant materials only reduces the impact of storm to some extent but cannot avoid the vandalism. The planets in our solar system gives you respective established respective traits like personality, lifestyle, health, struggle, happiness etc in different stages of life as per the past deeds (*karmas*).

Someone might face struggles or failures in spite of doing his best and on the other hand some people are born with golden spoon. This is what actually the bad or good deeds are of the past life that the person either enjoys this life or face hardships in this life. The only way to come out or to reduce the impact of struggles is to offer prayer (*pooja*) to the God of the respective planet which is giving bad results in life (which can be seen in horoscope), or doing remedies of those planets which could be helping the poor, donation in some kind, meditation etc.

Vedic astrology is the science which can be said to be as old as ancient India where the future of a person was decoded by

the placement of Sun or Moon along with Stars. So, the collection of sacred Hindu texts which originated from Vedas is the Astrology which is pervasive today. In Vedic Astrology we term Planets as “*Graha*” which is Sanskrit word used by Astrologers. In Vedic Astrology we consider Nine Grahas collectively termed as *Navgraha* which are:

Sun – *Surya*

Moon – *Chandra*

Jupiter – *Brihaspati*

Rahu – *North Node of Moon*

Mercury – *Budh*

Venus – *Shukra*

Ketu – *South Node of Moon*

Saturn – *Shani*

Mars – *Mangal*

Each planet is ruled by certain God which defines the certain aspect of life. So the person as per the past *Karmas* gets result in this life and so are the planets placed in his horoscope. Just to make easy to understand, for example if Sun, which represents Leadership, Name and Fame; is poorly placed in one's horoscope then it means that in the past life the person has misused his power while being a leader and did the wrong use of his Name and Fame in the past life, so in this life he has to repent or pay for his bad deeds done in the past life.

This very life is provided to get us spiritually connected which help in achieving ultimate goal which is attainment of salvation (*Moksha*). If we continue to do sins in this life too then we have to take rebirth and will continue to swing

between the Birth and Death and in every birth, we will be facing hardships.

Hardship I'm mentioning is only because if all the sins were neutralised then there would have been no rebirth. So, if in this life we get our soul connected with God in the form of prayers or worship (*pooja*) then we get free from this vicious cycle of rebirth and that is only achieved when we don't commit any new sins and pay for our past life bad deeds. So, as stated above in above example if Sun is placed badly and giving bad results in form of Bad Name, Fame and no leadership qualities in spite of doing hard work then offer prayer to Sun (Surya) like offering water to the Sun in morning.

VEDIC NUMEROLOGY

Welcome to the study of Vedic Numerology. Vedic Numerology is believed to be the ancient number calculating system which depicts the influence of numbers and their impact on individual's life events. Vedic Numerology is a science involving the numbers and the logic applied to do various calculations from the numbers in our Birth Chart. As this science has the pure origin in India, this is very much related to ancient Indian texts, the Vedas and has deep spiritual connections. The ancient Indians were the first to find out that the numbers are everything.

In Numerology, each number holds a different energy level and has unique vibration which influence individual's character, destiny and life events. There are various types of Numerology Studies of which Vedic Numerology is believed to be an ancient study and more precise and predictive. There are various combinations of numbers and the Yogas formed from them which helps in depicting the character and nature of a person along with their destiny and events which occur in an individual's life. In nut shell, Numerology can be used to make our lives better by channelizing the power and energy hidden in respective numbers

In ancient times when studies were not so much elaborated it was found by the priests or scholars at that time found that it is the number which one gets associated with when a person is born. Whenever a person is born, he comes with a number i.e. with a particular date and time, and after that he or she is given a specific name. So much before the name is

given to a new born, doctor gives the time at which he or she is born, number the baby has come with on this earth. So, we can say a new born comes with some specific number or set of number combinations whose energies and traits plays some specific role in his or her life.

No number is Good or Bad; it is only the energy level that number is holding and giving impact in one's life. One only needs to balance the energies of the numbers to get the fruitful result in life. If there are anti numbers in one's birth chart, it doesn't mean that the person's life will be ruined or he or she won't be successful in life. If that person is able to manage or balance the negative energies of the anti-number, then the person can lead a peaceful life too.

The Vedic system of Numerology assigns 9 different vibrations which is associated to 9 planets which in Vedic Numerology we call them as “**Grahas**” which have different traits. Each day, month, year, hour, minute, second holds a specific numerical value. So, Numerology plays an important role in a person's life.

The Vedic Numerology system takes into consideration of the North and South nodes of Moon i.e. Rahu and Ketu, too in consideration. Unlike other systems, Rahu and Ketu are also assigned certain numbers. So, we can say that not only planets, but, Sun, Moon, Rahu and Ketu are also given some specific numbers which relates with their respective traits.

According to Vedic Numerology there are 3 numbers which have major influence in an individual's life and these are:

1. Basic or Personal Number (**Moolank**) – It is the Date in Date of Birth which defines the way you

look at yourself i.e. your personality, your looks, your talents.

2. Destiny Number (**Bhagyank**) – It is the sum total of all the numbers in the Date of Birth and this number depicts how the world looks at you
3. Name Number – It is the sum of all digits associated with the alphabets in your name in the Chaldean Numerology Table

According to Vedic Astrology, there are primary nine planets which have a significant impact on one's life. As per the Numerology there are also basic 9 numbers, from 1 to 9. So,

the Astro Numerology correlate the effect of each planet with a particular number which is assigned to them. Sun, the celestial body, is a star which we in Astrology count in as a *Grah*, the planet. Moon, the Earth's natural satellite, is also counted in as one of the planets in Astrology. Like Earth has two poles, viz. North Pole and South Pole, Moon also has two nodes, the North Node and the South Node. The North node of Moon is referred to as Rahu while South node of Moon is referred to as Ketu and these Rahu and Ketu are also considered as planets in astrology.

The north node, Rahu is mysterious, materialistic, Machiavellian demon, who doesn't have head while Ketu is the south node, which is represented by the headless body of a demon and is directionless, spiritual and non-materialistic in nature. Rahu and Ketu are complete opposites of each other in nature and geographically being 180 degrees from each other.

So, five planets, the sun, the moon along with Rahu and Ketu comprise the nine planets in Vedic Astrology/Numerology for each of which a number is assigned.

We have seen above in the characteristics or traits of respective Personal Number and Destiny Number that there are two aspects of each number; the Positive Aspect and the Negative Aspect. We should understand why there is negative aspect or what made that particular number negative. For example, let's consider Number 6 (be it a Personal Number or a Destiny Number), so if Number 6 comes in Numerological Grid 1 or 2 times, then it will give positive results like the person will be romantic, caring, loving, family oriented, good finances; but on the other hand as Number 6 comes more than 2 times in the grid, the person might become less caring and loving, less family oriented and can have multiple relationships other than his/her own spouse and will also be having no control on the money the person is earning, i.e. person might spend money in bad

habits like the person might become drug addict or might become alcoholic. So, the saying that “EXCESS OF EVERYTHING IS BAD” holds true here. There can be possibility that number might be missing also which also gives negative or no effect of that number. We consider here the same Number 6, so if 6 is missing in the Numerology Grid, then there is possibility that person will not be much loving and caring and less family oriented, but here it doesn't mean that he or she is having relation outside other than his/her own spouse rather he/she will be occupied in work too much or will be living or posted outside his/her home town where the family is living i.e. living away from his/her family members that he/she is unable to give time to the family members and his finances will be wasted there by paying rent and food etc. So, one need to be very careful while making numerological predictions.

MASTER NUMBERS AND ANGEL NUMBERS

In 11, 22 & 33 are considered master numbers or angel numbers and have special energies associated with them. They belong to highly evolved soul people who have already learned the easy lesson in past incarnations and now have some of the more challenging lessons to learn. People with a master destiny number have been reincarnated many times and now have the opportunity to really make their mark on the world.

Unfortunately, many people on a master number find it too difficult to handle and they achieve just a fraction of their potential. There is always a degree of nervous tension associated with the master numbers which also makes it difficult for the people to achieve their aims. It is rare for people with master number to achieve success early on in life. Usually, they start off reflecting more of the potential of a 2, 4 & 6 but gradually become more confident and surer of themselves and the master number characteristics become more and more apparent. Usually, they achieve the most success late in life.

Calculating Master Numbers:

While calculating the Personal and Destiny numbers we may get the result as 11, 22 and 33 or a person's date on which he is born can be 11 or 22, so in Numerology we call these numbers as Master Numbers. In numerology the Master numbers 11, 22 and 33, represent amplified energies with spiritual significance. People with these master numbers have strong intuitive nature. The important point to note here

is that the numbers viz. 11,22 and 33 are not reduced to a single digit.

For example, if a person is born on 11/09/2009

Personal Number: 11 is the date on which he is born, so in this case as 11 is the master number, we won't reduce it to a single digit, i.e. we won't do $1+1=2$, instead we will take into consideration number 11 only

Destiny Number: $1+1+9+2+0+0+9 = 22$

So, in this case the destiny number comes out to be 22 which is again a Master number, so we won't reduce it to a single digit $2+2=4$, instead we will take number 22 into consideration.

Now in this case, we will take into consideration the effects/traits of number 22.

Master Destiny Number 11 (Master Idealist)

KEYWORDS - INTUITION, VISIONARY, LEADER, PSYCHIC, SENSITIVE, CREATIVE, INSPIRATIONAL, UPLIFTS, HUMANITY, BRING LIGHT, SPIRITUAL LIGHT

Positive Aspect: People with a master destiny number of 11 are idealistic, visionaries, maintain good relationship with others, caring, leaders, have unique ideas and are day dreamers rather than doers. However, they are extremely capable at whatever they do and with sufficient motivation can achieve anything. Because their ideas are not always practical, they need to evaluate them carefully before attempting to pursue them. The 11 is the most intuitive of all numbers and have divine connections and are spiritual too. It represents illumination, a channel to be subconscious, inside

without rational thought and sensitivity, nervous energy, shyness and impracticality. The 11 has all the aspects to enhance and be charged with charisma, leadership and inspiration. It is a number that when not focused on some goal beyond itself can be turned inward to create fears and phobias. The 11 walks the age between greatness and self-destruction. great plans, idealism, leadership and enormous self - confidence. If not practical, the 22s waste their potential. Like the 11, 22 can easily shrink from its own and vision causing difficult interior pressure. Both the 11 & 22 experience the pressure cooker effect very strongly, particularly at an early age. Negative Aspect: They struggle to balance their own needs against the needs of others

By looking at the above table indicating the compatibility of numbers with each other, anyone can find out that the relation between the Personal Number and the Destiny Number and also the compatibility of two persons by knowing their respective Personal and Destiny numbers. If both the numbers are favorable and are not anti to each other, then the numbers will give positive results in life else, the person may have to face negative traits of the numbers. While we check the compatibility between two people, in case of marriage or business partnerships, we need to see that these two numbers of one person should not be anti to the numbers of the second person.

I have mentioned in the table in the remark's column about the temporary and permanent relation of the numbers mentioned with star on them i.e. number 4,7 and 8 which I'll clarify by taking number 3. So, if someone has either Personal or Destiny number 3 and gets married to person with Personal or Destiny number 7, then there might be chances of an unsuccessful marriage as marriage is a permanent relation, but if number 3 has a friend who is having number 7 as Personal or Destiny number, then it will be a healthy and good relation as friendship is a temporary relationship. So similar case goes with number 4 and number 8.

PERSONAL YEAR, MONTH AND DATE

Astrology and numerology are intimately connected. Each planet rules over a certain number that lies between 1 and 9. Both, name and birth date are governed by planetary energies. Below mentioned are the planets and their ruling numbers:

1. Sun
2. Moon
3. Jupiter
4. Rahu
5. Mercury
6. Venus
7. Ketu
8. Saturn
9. Mars

PERSONAL YEAR

Simply add the numbers of your birth date and the year in question to find out which planet will control the coming year for you. Here is an example:

To calculate the Personal Year, let us understand by taking a random date of birth. Say, if you are born on 28 January 1990 (let's suppose), so take only Date and Month into consideration and exclude the year you were born in. Now, add the numerals 2 and 8 (28, date in your date of birth) and 0 and 1 (01, your month of birth) to the year in question, e.g. we need to predict for 2026, so take 2026 as the year instead

of the year 1990 in the year you were born, and calculate as per below:

$$\text{Add } 2+8+0+1+2+0+2+6 = 21 = 2+1 = 3$$

So, what we have seen, we have replaced the birth year (1990) by the year into consideration (here 2026)

The planet ruling your individual karma for 2026 will be Jupiter because this planet rules Number 3. Therefore, study the Jupiter's (Number 3) influence for 2026

Now how to see Personal Year is more important. So, the important thing to remember here is the personal year doesn't change as soon as the calendar year changes i.e. from 1st January of any year, instead the personal year of a person changes according to the date of birth. Say for example we take the above Date of Birth into consideration where the person is born on 28th January 1990

The person's personal year of 2026 will start from 28th January 2026 (i.e. the date when the person is born) and not from the Western Calendar Year 1st January 2026. So, till 27th January the person will be under the impact of personal year 2, but from 28th January the person will start showing the impact of personal year 3 (as calculated above).

This is the major factor to see the impact and predict for Personal Year of any person. Another factor which should be taken care of while doing the prediction of personal year is that the Personal Number i.e. **Moolank** should not be anti to the personal year number. To understand this, we will take the above example into consideration once again wherein the person is born on 28th January 1990. So here the Personal Number i.e. Moolank is

$$28 = 2+8 = 10 = 1+0 = 1$$

So here the Personal Number i.e. **Moolank** is 1. Now we see for the personal year of this person in year 1995, perform the calculation as above

Date: 28

Month: 01

Year in Consideration: 1995

So, add all the above numerals, i.e.

$$2+8+0+1+1+9+9+5 = 35 = 3+5 = 8$$

We see from the above calculation the personal year derived here is number 8 and the Personal Number i.e. **Moolank** of this person is 1.

We have seen that Number 1 and Number 8 are anti numbers, so the prediction will differ from the general predictions given below of the personal year. The results will not be as much fruitful as mentioned in the general predictions below of the personal year 8 and person has to see hardships in achieving the results of that particular personal year.

PERSONAL MONTH

Now as you know how to calculate Personal Year, please find below the calculation of Personal Month, where we have taken the same date of birth as taken in calculating Personal Year 28th January 1990

D.O.B.: 28-01-1990

So, for Year 2026, we take 28-01-2026

$$2+8+0+1+2+0+2+6 = 21 = 2+1 = 3$$

So, 3 is the Personal Year for the above Date of Birth for the Year 2026. Now when we want to calculate the personal month, say July, for this date of birth, then we will perform the calculation as per below:

Personal Year = 3

July = 7

Personal Month = Personal Year + Numerical Value for the Month to be taken into consideration

$$= 3 + 7 = 10 = 1 + 0 = 1$$

So, the personal month June for the above date of birth in the year 2026 will have the numerical value 1

PERSONAL DAY

Now as we did the calculation of Personal Month above, we will perform the calculation of Personal Day and this we will do by taking the same date of birth as taken in calculating Personal Year and Personal Month i.e. 28th January 1990

Personal Year for this date of birth in 2026 is 3 (as calculated in Personal Month above) and Personal Month for this date

of Birth for the month of July in 2026 is 1 (as calculated in Personal Month above)

Now we have seen that for this date of birth, we have calculated Personal Year 3 and Personal Month as 1, we will now calculate Personal Day 22nd July 2026

22-07-2026

$$2+2+0+7+2+0+2+6 = 21 = 2+1 = 3$$

Personal Day = Personal Year + Personal Month + Personal Day

$$= 3 + 1 + 3 = 7$$

So, the personal day 22nd July 2026 for the above date of birth will have the numerical value 3.

Now as we have learnt to calculate the personal year, personal month and personal day, we can calculate the same and can do the prediction of any day, i.e. how will be any one's particular year, month and day will be, using the above calculations.

VEDIC GRID

What is a Vedic Grid?

We know that since our birth, we get attached with some numbers which we see in our Date of Birth, which includes Date, Month and Year. All of these numbers which we get plays a major role in our life. There are overall 9 numbers, from 1 to 9, which represents a particular planet. The predictions are made after studying the combinations of numbers so formed in the grid

Vedic grid is numerological chart where numbers from 1 to 9 are placed in 9 cells as illustrated below. Here the numbers in the date of birth including Personal Number and Destiny Number are mapped or placed in each cell. By placing these numbers in each cell, numerologists can easily reveal the personality, strength and weakness of the person.

3	1	9
6	7	5
2	8	4

Studying the Rows

3-1-9 is called as SPIRITUAL PLANE. The person having numbers 3,1,9 in the grid is known to have spiritual and soul connection

6-7-5 is called as EMOTIONAL PLANE. The person having numbers 6,7,5 in the grid has a connection to our brain power and behavioral patterns

2-8-4 is called as **PHYSICAL PLANE**. The person having numbers 2,8,4 in the grid has a connection with our physical condition and material existence – its vitality, growth and decay

Interpretation of Planes

If maximum numbers belong to Spiritual Plane and Emotional Plane, then the person is successful in skill jobs and reaches the top. For example, Doctors, Engineers, Researchers etc.

If maximum numbers belong to Physical plane and less to Spiritual plane then the life is full of Ups and Downs. There are chances of incurring financial losses along with problem with the government related tasks. Their family life is disturbed and these people are generally seen living a hermitage life.

If maximum numbers belong to Emotional plane, then these people are greedy in nature. These people attain name and fame in business but will be having disturbed married life.

If maximum number belongs to Emotional plane and less number in Spiritual plane, then these people are prosperous with good family life.

If maximum numbers belong to the Left side of the grid, then that person's Left brain is more active and vice-versa

If both Left and Right side have equally distributed numbers then their brain functioning is balanced and progressive

How to make Vedic Grid

To make a Vedic Grid you first need to calculate your Personal Number and the Destiny Number which are also called as Moolank and Bhagyank respectively in

Numerology, from your Date of Birth and then plot these numbers in the cells as per their allocated places onto 3X3 grid, as shown above. The final grid made reveals the personality, nature, strength and weakness of the person. We will understand the step-by-step process to enter the digits in this 3X3 grid.

Step 1: Draw 3X3 Grid

Begin by making a blank 3X3 grid

Step 2: Calculate Numbers

From your Date of Birth, calculate your Personal Number (Moolank) and Destiny Number (Bhagyank). For example, if your Date of Birth is 22/07/1979 then perform the below calculation:

1. Personal Number: Reduce the date in date of birth to a single digit. As seen in the above case 28 is the date, so $2+2 = 4$. So, in this case Personal Number is 4, the number of Rahu
2. Destiny Number: Reduce the entire date of birth into a single digit. As seen in the above case the date of birth is 22/07/1979. So, adding all the numbers i.e. $2+2+0+7+1+9+7+9 = 37 = 3+7 = 10 = 1+0 = 1$. So, in this case Destiny Number is 1, the number of Sun (*Surya*)

Step 3: Placement of Numbers in Grid

As one can easily tell the numbers present in the Date of Birth, so place each number in the respective cell of the Vedic

Grid along with Personal Number and Destiny Number as calculated in Step 2 above. Important points to be taken into consideration

- We don't enter the century in the grid, i.e. if a person is born in 1979 we don't take 19 into consideration and similarly if a person is born in 2001, we don't take 20 while placing numbers in the grid.
- If your date of birth is 1,2,3,4,5,6,7,8,9, 10,20,30 of any month and year, then don't write the Personal Number in Vedic Grid

Below mentioned grid is prepared for the date of birth which is taken into consideration in Step 2, so below are the main numbers to be placed in the grid

Digits from Date of Birth: 2,2,7,7,9

Personal Number: 4

Destiny Number: 1

	1	9
	77	
22		4

Step 4: Decoding the Grid

ASTRO NUMEROLOGY

Vedic Astrology and Vedic Numerology: ASTRO NUMEROLOGY

Vedic Numerology is somewhat related to Vedic Astrology. Astrology when combined with Numerology, i.e. when both these sciences are studied together, we can get the appropriate results. Each and every planet in the universe has some traits and attributes associated with them and so the numbers. These planets were then assigned some specific numbers according to their behavior and effect. In addition to the planets, Sun and Moon have also been assigned some specific numbers.

When universe was formed through vibrations, building blocks like various celestial bodies were formed which in astrology we call as Nakshatras. These Nakshatras we associate them with the birth chart which in turn uses the date and time in addition to the place of birth. All of them viz. date, time and place of birth (which uses Latitude and Longitude of the place) leads to numerical values or numbers. The basic numbers which are from 1 to 9 holds some vibrations and traits as mentioned below:

Number 1: this is the number of Masculine influences which denotes New Beginning, Creation, Initiation, Independence, Inventive, Original and Leadership

Number 2: this is the number of Feminine influences which depicts balance in life, cooperation, partnership, tact, diplomacy, harmony and unity

Understanding Elements

There are four classical elements viz. **Earth, Air, Water and Fire**, which are believed to be the fundamental building blocks of all matter and a cornerstone of ancient philosophy and were first proposed by the Greek philosopher Empedocles around 450 BC.

Earth: Relates to safety, protection, the material world, physical body, Practical, conservative, grounded. It corresponds to the root space, dirt, trees, rocks, food, bones, ancestral wisdom, and the physical energies that support and sustain us.

Air: Relates to intellect, ideas, inspiration, mind, speech, social circle, communication, change. It corresponds to the throat and heart space, wind, sound, smoke, smells, feathers, birds, and unseeable forces that influence our minds.

Water: Relates to emotions, intuition, feelings, the subconscious mind, mystical, silent, introspective, artistic creativity. It corresponds to the sacral area, springs, the ocean, tears, shells, aquatic animals, things in a liquid state like melting wax, and the forces that move us to feel so we can cleanse and heal.

Fire: Relates to transformation, action, power, ego, energy, life force, creativity, adventurous, emotional intelligence. It corresponds to the solar plexus area, flames, heat, candles, the phoenix, dance, and the destructive forces that ultimately encourage new growth.

Element	Astrological Sign	Direction	Colour	In Tarot
Earth	Taurus, Virgo, Capricorn	North	Green	The suit of Pentacles
Air	Gemini, Libra, Aquarius	East	Yellow	The suit of Swords
Water	Cancer, Scorpio, Pisces	West	Blue	The suit of cups
Fire	Aries, Leo, Sagittarius	South	Red	The suit of wands

Interpreting How the Elements Affect Each Other

Earth mixed with water muddies it so the two energies can inhibit each other. Earth dumped on fire puts it out; it will inhibit the adventurous, creative aspect of fire.

Earth and air will complement each other for earth will keep the changeable air grounded and practical.

Air will fan a fire to burn brighter or it can, if strong enough, put it out. Social contact, speech (the bouncing of ideas around with others), change of point of view, all can enhance the creativity, the adventure that is Fire. But too much socializing or trying to please others and change of mind can inhibit creative expression and sense of adventure.

Water will make a fire hiss and spark, but enough of it will drown it. Water, being alone, study, meditation, intuition can support the creative, adventure, energy of fire, but too much isolation, study of others' ideas, opinions, can dampen your own spark of adventure and creativity.

If there is a lot more earth in the name, the person will be very conservative, practical, and "earth bound." They may be rigid in their thinking, practical to a fault and very materialistic in beliefs and in the accumulation of money, power, and things.

If there is a lot more air in the person's name, they will be "flighty," an "air head." They will not make sense. They will be so changeable that you will not be able to depend on them. They will always need others around and will want to dominate any conversation.

If there is a lot of water in the name, this person will be very Spiritual, quiet, and a loner. They will not do well in the practical world of earning money and dealing with power. They will not seek out others often or be interested in physical activity.

If there is a lot of fire in the person's name, they will be a "go-getter." They will have lots of energy, love to be daring and seek lots of adventures. They will be very intelligent and creative. They will be on the move most of the time.

The Expression of the Energy of the Letters in the Name

Each letter of the alphabet expresses on a certain level, either the mental, physical, emotional, or intuitive level. This will determine how the energies express through you. In this section, we will find how the energies express through you.

First, find out on which level, mental, physical, emotional, or intuitive, each letter of the name expresses on and then arrange the levels from greatest to least in frequency. Third, see how these levels will affect the numbers, elements, colours, and each other. The steps below walk you through these items one at a time.

Letters that express through the mental level are: A G H J L
N P

Letters that express through the physical level are: D E M W

Letters that express through the emotional level are: B I O R
S T X Z

Letters that express through the intuitive level are: C F K Q
U V Y

If the emotional level is the strong, then whatever numbers are strong, emotions will play the role. The job, the relationship, the book, etc. will need to appeal to the emotional side of the person, will be a part of the life force, activity of fire, the silent, meditative side of water, the social, changeable part of air and colours.

If the mental level is strong, then the mind will need to be active and guide the activity of the numbers, elements, and colours.

If the physical level is strong, then the person will be very active physically. This will influence the numbers, elements, and colours.

If the intuitive level is strong, that will guide the numbers, elements, and colours.

If the emotional and mental are equal, then there could be a pull between making a decision on feelings versus logic. But

if feelings and logic agree, if the mind and the emotions are in agreement, that person will make a choice and will not be moved from it.

If the emotional and physical are equal, the physical active will also need to have an emotional response, say, be excited about the challenges of playing football.

Think how the elements react with each other

Earth mixed with water muddies it so the two energies can inhibit each other. Earth dumped on fire puts it out. It will inhibit the adventurous and creative aspect of fire.

Earth and air will complement each other because earth will keep the changeable air grounded and practical.

Air will fan a fire to burn brighter or it can, if strong enough, put it out. Social contact, speech (the bouncing of ideas around with others), and change of point of view, all can enhance the creativity, the adventure that is Fire. However,

too much socializing or trying to please others and change of mind can inhibit creative expression and sense of adventure.

Water will make a fire hiss and spark, but enough of it will extinguish it. Water, being alone, study, meditation, and intuition can support the creative, adventure, energy of fire, but too much isolation, study of others' ideas and opinions can dampen your own spark of adventure and creativity.

If there is a majority of earth in the name, you will tend to be very conservative, practical, and "earth bound." You may be rigid in your thinking, practical to a fault, and very materialistic in beliefs and in the accumulation of money, power, and things.

If there is a majority of air in the name, you will tend to be “flighty.” You will not make sense and you will be so changeable that you will not be dependable. You will always need others around and will want to dominate any conversation.

If there is a majority of water in the name, you will tend to be very spiritual, quiet, and a loner. You will not do well in the practical world of earning money or dealing with power. You will not seek out others often or be interested in physical activity.

If there is a majority of fire in the name, you will tend to be a **“go-getter.”** You will have lots of energy, love to be daring and seek lots of adventures. You will be very intelligent and creative. You will be on the move most of the time.

CASE STUDY

To understand the concept of AstroNumerology – Astrology and Numerology combined, we will do a case study, as per below:

Name: VICKY KAUSHAL (Bollywood Actor)

Date of Birth: 16/05/1988

Lagna Chart

	1	
6	7	5
2	88	

Same Astrological and Numerological Result in Profession and Earning:

Now as we see from Astrological Chart, 11th house is having Drishti of Sun, which is the house of Income and Profits and

everyone know his wealth. The income that is earned is from his work is reflected in this house.

Now his nature of work is very well justified when we see that Moon is having its 7th Drishti on 10th House. The nature of his work is very well in associated with Moon, where in a person is creative in nature and can try his career in the creative related field, like he can become an artist, or an actor or anything like that.

Astrologically he is carrying a *Gajakesari Yoga* a well – known **Raj Yoga**. **Gajakesari Yoga** is formed when Jupiter and Moon are in **Kendra** i.e. 1st House, 4th House, 7th House and 10th House and in his astrological chart it is clearly seen he is having a **Strong Gajakesari Yoga** because in spite of Jupiter and Moon present in **Kendra** these two planets are in the same house i.e. **Kendra's 4th House**. This is a powerful Yoga which indicates the qualities of two strongest animals viz. Elephant which represents Strength and the Lion which represents Courage in an individual's life.

Now if we talk in Vedic Numerology aspect, 6,7,5 forms a **Raj Yoga**, where success in profession is seen, person is creative and is in skillful job, have good money management. Here we also see numerologically the **Chaturbhuj Yoga** is formed because of the presence of numbers 1,6,8,5 which is a powerful combination where in a person reaches in the pinnacle of profession. Numbers 1,5,8 gives fame and success and abundance of money.

Same Astrological and Numerological Result in Education Sector:

Mars has 4th Drishti on 5th House which is the house of Education where Sun and Mercury are already placed

making ***Budhaditya Yoga***, which means that the person will go in some technical field. He did his engineering in year 2009 which adds number 9 in his Vedic numerology grid, which brought the numbers 1-9 and 9-5 in his Vedic Numerology grid, which are favorable for engineering.

Conclusion:

Here the motive of giving an example was only to justify that many aspects are common when we derive at conclusion of a person's life either Numerologically or Astrologically. When we predict results from a person's chart be it a Vedic Numerology Grid or Vedic Astrology Chart, we find that many results are common, like as mentioned above in the case study of Vicky Kaushal. But to give an accurate result we cannot rely just on Numerology we have to see the Astrology Chart also wherein we can see the exact placements of planets and their conjunctions with other planets. So, in nut shell I must say that Numerology without Astrology is Incomplete. Numerology and Astrology being 2 different sciences working on the same aspect of an individual's prediction, these two sciences should not be seen individually and results should be predicted by taking these sciences together on consideration.

NAME NUMEROLOGY

Let's understand how numerology effects our name. In numerology, every alphabet is given a certain number like A is assigned number 1, K is assigned number 2, N is assigned number 5, Z is assigned number 7 and so on and each number represents a planet and specific energy. So, anyone can easily calculate the total of name number and see if the total of name number is compatible with the Personal Number and Destiny Number. If the derived numbers (Personal Number and Destiny Number) from your date of birth is not compatible with your Name Number, then it can be a precursor of adversity, hardships, sense of inferiority, and dissatisfaction. While you may have credited the feeling of being stuck or not being good to your inner capabilities or to the external factors, the reason could be your name. To understand whether your name is eclipsing you from the world of growth and attracting opportunities, Numerology is there to assist you with the help of which we can correct our name and align the energy of our name with our Date of Birth.

A Numerologist sees numbers as vibrational expressions. Numbers are also associated with letters. Both numbers and letters describe certain vibrational patterns. These patterns are forcing that manifest within a person's life and their environment. By examining a person's name and birth date an interpretation can be made. Here we use Chaldean Numerology for evaluating the vibration or the Name Number of an individual:

1	2	3	4	5	6	7	8
A	B	C	D	E	U	O	F
I	K	G	M	H	V	Z	P
J	R	L	T	N	W		
Q		S		X			
Y							

For example, we calculate the number of Name AMAN BHATIA

Now using the above table

A M A N B H A T I A

$$1+4+1+5+2+5+1+4+1+1 = 25$$

$$2+5 = 7$$

So, we write 25/7 meaning 7 is derived from compound number 25.

A M A N B H A T I A = 7

Year coming = 2026

Add $7+2+0+2+6 = 1$

Add $1+7 = 8$

So, 8 is the ruling year number in context with your name. Therefore, study the Saturn's (number 8) influence for 2026 and enjoy!

See, calculating the results of any year should be taken into consideration only when the exact Date of Birth of a person is not known, i.e. only Name is known. As I always say first the number gets associated when we take birth i.e. by Date, Month, Year and Time of birth which are all Numbers and after that only we are given some Name by our parents. So, if anyhow Date of Birth is not known, one can make prediction by the Name also for the coming year, which also works.

NAME CORRECTION – Who and Why you should get it done?

Numerology works for everyone, but it mostly brings in endless opportunities for those who has everything else from the right skill set, hardworking nature, persistent and consistent spirit, rectitude but lacks a bit of fortune. With Name Correction and alignment, you allow luck to do the rest of it, going the extra mile and ensuring happiness, success, prosperity and growth in your personal and professional life.

Jobs and Business Owners

Name vibration and perception work regardless of your skills and occupation. With Name Correction you can see a change in your perspective, credibility, trust, growth, recognition, and much more throughout your life.

For Relationship

When one feels that you are not loved and cared for in spite of putting efforts in your relationship, or if you are having continuous disagreements in relation, fights, feeling of being alone, not getting acknowledged and rewarded and you seem to feel that this is how you will spend rest of your life, then Name Correction is strongly recommended.

Business Name as per the Industry

We have seen many a times that two people are running same business selling same products or services, yet one business gains name and fame while the other business owner struggles to grow. One business owner is making profits, have good clientele, good staff while other one is deprived of all these benefits. One of the major reasons behind this is the Name Vibration of the business or the brand name the one is carrying. The name number energy should match with the owner to make the business grow. You will be surprised to know that many big companies follow the concept of Name Vibrations while naming their business brands or naming their companies. Let's see, for example, the companies which are into technology related business, bring their company's name to the vibration of Number 7. Major companies like Apple, Samsung, Sony, Tesla have their company's name vibration of Number 7. Why? Because Number 7 denotes regular research and development, so bringing down their company's number on Number 7 these companies grow at much faster pace and give much better results. But on the other hand, if they stop doing researches and innovations then they will stop growing. For example, we all know Nokia, which was on the top in the field of making Mobile Phones is also on Vibration 7, but we all

know when Android Operating System came, Nokia didn't upgrade themselves in research and they missed the race and the Number 7 stopped giving results and now we all know there is mere existence of the company.

Name Correction and Results of Name Correction

Name correction includes addition or deletion of alphabets in your existing name. So, when you change the spelling of your name, the Vibration of your name gets changed. The pronunciation of your name remains the same but spelling of your name changes. So, whenever you tell someone the spelling of your name, the same vibrations enter universe and that name start giving you positive results.

In Bollywood industry there are many stars who have changed their names, like Ajay Devgan has corrected his name to Ajay Devgn, Rajkummar Rao from Rajkumar Yadav, Ayushmann Khurrana from Ayushman Khurana, and Suniel Shetty from Sunil Shetty, Rani Mukerji from Rani Mukherjee etc.

There are many examples also in business industry where name correction is done in the brand names like Raymond was previously Raymond's, Haldiram's was previously Haldiram etc.

So, there are many examples wherein a person or business man has either changed their own name or their brand name and aligned the new name according to their Date of Birth Numbers (Moolank and Bhagyank)

Factors to be considered while changing the Name:

1. Name Number should be aligned with Date of Birth
i.e. it should not be anti-number of Personal Number

or the Destiny Number (Moolank and Bhagyank respectively)

2. Try to add that alphabet which is coming thrice.
3. Preference should be to do alterations in the First Name and bringing the Full Name to a positive Number as per the Date of Birth
4. One should avoid doing alteration in the Surname
5. Letter “U” should be avoided while adding it into the name.
6. Try to add vowels instead of consonants
7. First Name Number or the Full Name Number should not be 14 (especially in case of females)
8. First Name and Full Name should be a benefic number 1,3,5,6 and number 9 in some cases can be taken but it should be seen that 9 doesn’t come from 27 or 45
9. Name Number should not be 4 or 8
10. As far as possible, the First Name Number should not be anti-number
11. In Business, if the firm is partnership firm, then the Date of Birth of the person holding the major stake in the company should be taken into consideration.
12. If all the partners are holding same stake in the company, then the common positive number of all of their Date of Birth’s number should be taken into consideration

BUSINESS NAMES

When selecting a name for your business, the first thing you need to consider is the type of business you're starting. Is your business going to sell beauty products, sports equipment, household appliances, provide babysitting, or offer limousine service? Start by brainstorming and write down all possible names you can think of; you can even ask your friends and relatives for possible suggestions. Then convert each of the names into a single-digit number and select the one you like best. Notice I said the one *you* like best, because if this is your business, the name as well as the number have to resonate with you.

There aren't any particular numbers that are "best" for a business—any and all numbers are good numbers. There are also no bad numbers, but some numbers are better than others for certain types of businesses. Does this mean that your business will suffer if you select the wrong number? No! But for the ease of your customers and your business in general, you might focus first on finding the name before worrying about the number associated with it—after all, you don't want to have an oddly spelled business name just because it reduces to the number you picked out.

When I assist clients choosing a business name, I always ask for their input. Frankly, my vote is for a clever name that attracts attention before a number that you like. You can always incorporate under a name and corresponding number that you like, but call the business by a catchy name.
